

REACH

European Regulation n°1907/2006

Regulation

REACH means Registration, Evaluation, Authorization and Restriction of Chemicals. This European directive concerns all chemical substances produced or imported in Europe which must be registered, evaluated and controlled.

The REACH program concerns the most dangerous products, using them can be restricted even forbidden.

Control and penalty

Only items in accordance with the REACH regulation can be sold.

Controls are made by customs, in the market or within companies by competent authorities. Importing or using a noncompliant items exposes you to considerable financial or penalty sanctions.

Our initiatives

As a user of chemical products, Dickson PTL checks that all products purchased are registered and authorised for our use.

This is a continuous process for improvement and we constantly monitor products that undergo a status change, to ensure the lowest impact on our own products.

In accordance with REACH

All chemical products used by Dickson PTL are registered. Our products do not contain noncompliant substances or contain them only in rates inferior to authorised limits (0,1%).

Your actions

As coating fabrics buyers, you have to check that products are in accordance with REACH.

For more information, you can consult the European Chemical Agency (ECHA) on line:
<http://echa.europa.eu>

REACH does not recognise any pictograms identifying products in accordance with the directive.
